ABSTRACT

Control-M

Control-M SaaS: What's New in October 2026 (WBT)

Learning Path >

Course Code: AUTO-CSWN-2026

Modality	Duration	Applicable Versions	Target Audience
Web-Based Training (WBT)	30 Minutes	Control-M SaaS (October 2026)	• Operators • Schedulers • Administrators

Course Overview

Control-M SaaS is a workload automation solution that enables organizations to schedule and execute business workflows across multiple platforms and applications from a single point of control. It enables users to define, organize, automate, and monitor workflows using jobs, scheduling criteria, dependencies, and other workflow components.

This course introduces the **Control-M SaaS enhancements included in the October 2026 release**. It provides an overview of the key updates and changes included in the release, helping learners become familiar with the latest capabilities and their impact on working with Control-M SaaS.

***Note**:*
In addition to English, the course content is available in Chinese, French, German, Italian, Japanese, Korean, Portuguese, and Spanish.

Learning Objectives

- Identify key enhancements introduced in the October 2026 release of Control-M.
- Describe enhancements to Control-M Web, SaaS operations, AI, and Data Assurance capabilities.
- Recognize new capabilities in Workload Change Manager, Automation API, Managed File Transfer, and Application Integrator.
- Identify new and updated Control-M integrations and their associated enhancements.
- Describe how the October 2026 enhancements support monitoring, automation, resilience, security, and integration capabilities.

Course Lessons

Lesson 1: Control-M Web Monitoring and User Experience Enhancements

- Identify key Control-M Web user interface and monitoring enhancements.
- Describe enhancements to the Viewpoint Gantt View.
- Identify the Find and Update enhancements.
- Recognize improvements to Control-M Archive Search.

Lesson 2: Control-M SaaS Operations, Resilience, and Insights

- Describe key Control-M SaaS operational and resilience enhancements.
- Identify improvements to SaaS update and maintenance notifications.
- Recognize the capabilities provided by Workflow Insights Service.

Lesson 3: Control-M AI Enhancements

- Describe enhancements to Control-M AI analysis and troubleshooting.
- Identify enhancements to AI administration and service upgrades.
- Recognize the capabilities provided by AI Pilot for Monitoring.

Lesson 4: Control-M Data Assurance Enhancements

- Describe the availability of Data Assurance in Control-M SaaS workflows.
- Identify validation capabilities for text-based files.
- Recognize the new metrics and validation options.

Lesson 5: Change Management and Automation API Enhancements

- Describe new Automation API capabilities for Workload Change Manager.
- Identify workspace check-in and export capabilities.
- Recognize key enhancements to Control-M Automation API.

Lesson 6: Managed File Transfer Enhancements

- Identify key security and configuration enhancements in Control-M MFT and MFT Enterprise.
- Describe enhancements to MFT Enterprise site portability, database support, and disaster recovery.
- Recognize enhancements for managing external users and file transfer connections.

Lesson 7: Application Integrator Enhancements

- Identify key security and deployment enhancements in Application Integrator.
- Describe the multi-line SQL query capability available for Application Integrator plug-ins.

Lesson 8: Control-M Integration Enhancements

- Identify newly available Control-M integrations.
- Recognize enhancements to existing integrations.
- Describe the new connection profile options introduced for supported integrations.
