

BMC AMI Catalog Manager for Db2® 13.x: Fundamentals Using (WBT)

[Learning Path >](#)

Course Code: ADDB-CAMU-F131

Modality

Web-based Training (WBT)

Duration

3 Hours

Applicable Versions

BMC AMI Catalog Manager for Db2® 12.1 and 13.1

Target Audience

- Database Administrators

Course Overview

BMC AMI Catalog Manager for Db2® is available under BMC AMI Database Administration for Db2® solution. This product provides an efficient gateway to Db2 catalog information. Using an interface based on the Interactive System Productivity Facility (ISPF), Catalog Manager provides interactive access to catalog information and application data with simple-to-use menus and panels.

This course provides learners with the relevant information required to manage a Db2 environment effectively. With Catalog Manager for Db2, users can quickly learn to perform database administration tasks. This administrative product prompts users for the necessary information to construct the required Db2 syntax, making it easy to execute requests without requiring extensive knowledge of SQL or utility statements. This course also covers advanced features of the product, such as utilities, utility profiles, and logs.

Prerequisites

- BMC AMI Database Administration for Db2® 13.x: Fundamentals Concepts (WBT)

Learning Objectives

- Explain the basics of Catalog Manager, its components, and the benefits of the product
- Navigate through BMC AMI Catalog Manager for Db2®
