DELIVERY METHOD

- » Web-based Training (WBT)

COURSE DURATION

- » 1 Hour

PREREQUISITES

- » BMC AMI Recovery for Db2® 13.x: Fundamentals Concepts (WBT)

RECOMMENDED TRAININGS

- » NA

Course Overview

BMC AMI Command Center for Db2® is a web-based interface to access and manage Db2 databases, data, and custom BMC Db2 applications. Along with providing an intuitive graphical user interface to access database information quickly, it offers secure, role-based access levels to data and actions that can be performed on data.

This course is designed to introduce you to the database recovery management process using BMC AMI Command Center for Db2®. Along with setting up a dashboard view and generating recoverability reports for an object set and the entire catalog, you will learn to set up views to monitor recovery, copy progress, and estimate time for backup and recovery.

Target Audience

- » Database Administrators

Learner Objectives

- » Explain the recovery process using BMC AMI Command Center for Db2®
- » Discuss the settings for recovery management options
- » List the steps to generate recoverability reports and refresh the reports
- » Review the process to simulate recovery and monitor its progress
- » Review the copy progress
- » Describe how to view a Backup Time estimation report
- » Describe how to view a Recovery Time estimation report
