Subscription Overview

BMC AMI Data offers a complete and automated set of IBM® Db2® and IBM® IMS® solutions to optimize mainframe IMS transaction and data management.

BMC AMI Data for Db2 solutions leverage automation and intelligence with fast and powerful data movement, migration, optimization, recovery, and compliance capabilities.

BMC AMI Data for IMS enables you to efficiently manage complex IMS environments and keep IMS available for processing virtually 24x7.

Using videos and skills assessments, the content of the online education subscription provides an overview of BMC AMI Data and details the use of this solution to identify and remediate system vulnerabilities.

The skills assessment is not an exam and is not meant to test individuals but to provide students and teams an overview of existing and missing skills to select the appropriate training.

Note: This content is part of an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.
