Course Overview

BMC AMI Ops Automation (BMC AMI OpsA) product is part of the BMC AMI Ops Automation for Data Centers solution. This product provides tools and applications to improve an operator's ability to provide high system availability and helps the operator through error minimization, improved productivity, and problem determination and prevention.

BMC AMI Ops Automation provides two mechanisms to automate workflow, Rules and EXECs.

This course will help Programmers (System Programmers/Application Programmers), and Administrators (System/ technical system/storage Administrators) understand EXECs and what one can achieve using them.

Note: BMC AMI Ops Automation was formerly known as MainView AutoOPERATOR™.

Target Audience

- » Programmers (System Programmers/Application Programmers)
- » Administrators (System/Technical System/Storage Administrators)
