Modality

Online – Non-Proctored

Duration

2 Hours

Applicable VersionsBMC AMI Datastream
for DB2 6.2, 7.1**Target Audience**

- System Programmers

Purpose of Skills Assessment

Db2 has become the enterprise server standard for database performance and availability for the massive workloads managed on mainframes. For end-to-end security, your organization needs to include an audit trail for Db2, and that trail starts with a function called Database Activity Monitoring or DAM.

BMC AMI Datastream for Db2 delivers constant Db2 security alerts to BMC AMI Command Center for Security, BMC Datastream SIEM Correlation Server for Windows/UNIX, or any name-brand Security Information & Event Management (SIEM) product. With BMC AMI Datastream for Db2, security administrators now have up-to-the-second visibility that includes a host of user events centered around attempts to view or access the secure state of your Db2 environment.

The skills assessment is not an exam meant to test individuals but to provide students and teams an overview of existing and missing skills to select the appropriate training. Assessment takers shouldn't prepare and retake the assessment to avoid receiving incorrect recommendations.

Reviewed Skills

The knowledge and understanding around the following topics are checked:

- Key features and customer benefits of BMC AMI Datastream for Db2
- BMC AMI Datastream for Db2 Licensing
- TRACE facility
- CZASEND program
- Local Joblog
