BMC AMI Security

BMC AMI Security: z/OSMF Install for AMI Resident Security Server (WBT)

Learning Path >

Course Code: ASEI-ARSS-I203

Modality	Duration	Applicable Versions	Target Audience
Web-based Training (WBT)	2 Hours	BMC AMI Resident Security Server 2.3	• Administrators • System Programmers

Course Overview

The BMC AMI Resident Security Server is an infrastructure component for the BMC AMI Resident Security Server (RSS) product suite. The BMC AMI Security: z/OSMF Install for AMI Resident Security Server course guides you through the z/OSMF installation process for installing BMC AMI Resident Security Server.

It introduces you to IBM z/OSMF, which is an intuitive browser-based interface designed to enhance your product installation experience. This powerful tool helps simplify the installation process by streamlining various traditional tasks and automating others, making it easier and more efficient to manage all the product installations.

In addition to English, the textual content of this course is available in French, French (Canada), German, Italian, Japanese, Korean, Portuguese (Brazil), and Spanish (Mexico).

Prerequisites

- BMC AMI Ops: z/OSMF Install for z/OS® Basics (WBT)

Recommended Trainings

- NA

Learning Objectives

- Discuss the z/OSMF install basics
- List the features of the z/OSMF Install Process for BMC Products
- List the benefits of the z/OSMF install process
- Discuss the BMC Common Configuration Repository
- List the steps for z/OSMF installation
- Order a new product using EPD
- Discuss the checklist to download the PSI
- List the steps for the z/OSMF installation
- Discuss the ordering process
- Order the AMI Resident Security Server product using the EPD site
- Download the PSI using z/OSMF
- Deploy the PSI using z/OSMF
- Submit the deployment jobs
  Perform the product workflows

Course

Lesson 1: Product Ordering
- z/OSMF Install Basics
- Features and Benefits of BMC z/OSMF Install
- BMC Common Configuration Repository
- Steps for the BMC z/OSMF Installation
- Ordering Through the EPD Platform
- Order System
- z/OSMF Installed Products
- Product Details and Dependencies
- Add Product to Order
- Review Order

Lesson 2: Product Deployment
- Checklist to download the PSI
- z/OSMF Desktop
- Software Management Window
- Start a new Deployment
- Deployment Checklist
- Downloading the PSI
- Specify Deployment Properties
- Add Portable Instance
- Server XML
- Target System and USS Directory
- Add the JCL DataSet Name
- Generate the Job JCL
- Job to Download PSI
- Submit Job
- Submitted Job Status
- Select the PSI to Deploy
- Objectives of Deployment
- Configure the Deployment
- Distribution Libraries
- Selecting the Model
- Source Software Option
- SMPE Zones
- Rename and Modify Data Sets
- Target Files Category
- Target Data Set Catalog
- Storage Class
- Mount Points
- Define the Job Settings
- Submit the Deployment Jobs
- Generated Jobs
- View the Job Output
- Deployment Complete
