Modality	Duration	Applicable Versions	Target Audience
Web-based Training (WBT)	1 Hour	BMC AMI Security Privileged Access Manager 2.3	<ul style="list-style-type: none">AdministratorsSystem Programmers

Course Overview

The BMC AMI Security: z/OSMF Install for AMI Security Privileged Access Manager course guides you through the z/OSMF installation process for installing the BMC AMI Security Privileged Access Manager (PAM) product.

It introduces you to IBM z/OSMF, which is an intuitive browser-based interface designed to enhance your product installation experience. This powerful tool helps simplify the installation process by streamlining various traditional tasks and automating others, making it easier and more efficient to manage all product installations.

In addition to English, the textual content of this course is available in French, French (Canada), German, Italian, Japanese, Korean, Portuguese (Brazil), and Spanish (Mexico).
