» ASSR-COWN-1070

APPLICABLE VERSIONS

» 10.7

DELIVERY METHOD

» Web-based Training (WBT)

COURSE DURATION

» 1 Hour

PREREQUISITES

» NONE

Course Overview

BMC TrueSight Capacity Optimization is a **digital service assurance** solution that aligns IT resources with service demands and business priorities, resulting in on-time service delivery and optimized costs.

This one-hour WBT covers the enhancements in version 10.7 of the product. Students will learn about the migration of the views to the TrueSight console, creation of a custom view on the TrueSight console, data integration and administration-related enhancements, usage of data marts for custom views, enhanced reservation analytics, and enhanced security considerations.

Target Audience

- » Administrators
- » Users

Learner Objectives

- » Study the Capacity Views Transformation and create custom views on the TrueSight console.
- » Utilize the advanced data integration and administration capabilities to collect and process data from different components.
- » Extract the support for big data using Moviri integrators.
- » Use the enhanced reservation APIs to create reservations and make placements.
