

BMC Helix Operations Management: Enterprise Education Subscription

COURSE ABSTRACT

CURRICULUM CODE

- » ASSR-ENT-SUBS-BHOM

DELIVERY METHOD

- » Videos
- » Web-based Training (WBT)

Subscription Overview

BMC Helix Operations Management is a SaaS based solution that covers monitoring, event management, and other ITOM capabilities. It features a modern user experience and automated workflows to streamline monitoring and event management.

This subscription provides a deep dive of BMC Helix Operations Management features and capabilities. The demonstrations, videos, and presentation content included in the subscription provide a clear understanding of the features and capabilities of BMC Helix Operations Management and how to leverage them.

Note: This content is part of an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.

Target Audience

- » Operators
- » Administrators
- » Consultants

Learner Objectives

- » Understand the business solution offered by BMC Helix Portal
- » Use the BMC Helix Portal
- » Appreciate the business requirement of BMC Helix Operations Management
- » Understand the high-level architecture of BMC Helix Operations Management
- » Understand Group monitoring
- » Learn how to configure Device Monitoring
- » Create visualizations and add it to a dashboard
- » Monitor and analyze events
- » Perform basic operations on BMC Helix Dashboard
- » Create folders and playlists in BMC Helix Dashboards
- » Build queries for events and metrics data type
- » Configure annotations and links
- » Configure Variables
- » Create a query variable for events data type
- » Create alarm policies
- » Create monitor policies
- » Generate events from logs
- » Aggregate events using correlation policy
- » Create basic enrichment event policy
- » Create a notification
- » Filter unwanted events
- » Understand user identities and user access
- » Create, edit, and delete users, user groups, and roles

Offerings

Sr. No.	Course Title	Description	Duration (mins)	SPT	WBT	CERT
1.	BMC Helix Portal: Overview (WBT)	BMC Helix Portal is a SaaS solution with built-in common services on a microservices-based architecture and a set of integrated BMC Helix products from a single, unified view for an improved end-user experience. In this course, the learners will be guided on how to access BMC Helix Portal, understand user access, and become familiar with various functional areas of the BMC Helix Portal Console.	30		✓	
2.	BMC Helix Operations Management: Overview (WBT)	This course introduces the learners to features and benefits of BMC Helix Operations Management. In addition, the course provides an overview of BMC Helix Operations Management console and its tabs.	25		✓	
3	BMC Helix Operations Management: Fundamentals Device Monitoring (WBT)	This course provides an overview of Devices and Device Monitoring. In addition, the course demonstrates the steps to access the Devices page in BMC Helix Operations Management Console.	20		✓	
4	BMC Helix Operations Management: Fundamentals Groups (WBT)	This course provides an overview of groups for devices and entities. In addition, the course enables learners to access the Groups page and Groups	20		✓

COURSE ABSTRACT

Sr. No.	Course Title	Description	Duration (mins)	SPT	WBT	CERT
		Details page in BMC Helix Operations Management console.				
5	BMC Helix Operations Management: Fundamentals Log Analytics (WBT)	This course provides an overview of BMC Helix Log Analytics. After completing the course, the learners will be able to access BMC Helix Log Analytics and identify the roles associated with it. In addition, the learners will be able to filter data to be analysed, create visualization, add it to a dashboard, and access saved objects.	25		✓	
6	BMC Helix Operations Management: Fundamentals Event Processing and Analytics (WBT)	This course introduces the learners to event monitoring and event analysis. After completing this course, the learners will be able to perform basic event monitoring tasks, such as accessing events, customizing event list display preference, setting event preferences, and filtering events. In addition, the learners will be able to analyze an event cluster.	30		✓	
7	BMC Helix Dashboards: Overview (WBT)	BMC Helix Dashboards is a SaaS service on the BMC Helix Portal that can be used to create interactive dashboards for your environment. It offers unified reporting and gives you a consolidated view of data from applications across your environment. You can easily create, export, and share interactive dashboards with users within or outside your environment. In this course, the learners will be guided on how to access BMC Helix Dashboards, cross-launch it from various applications, understand the concept of dashboards, panels, and playlists. Also, the multiple options for sharing and scheduling reports will be explained.	60		✓	
8	BMC Helix Operations Management: Fundamentals Working with Dashboards (WBT)	This course introduces the learners to configure panels and queries in dashboards. After completing this course, the learners will be able to build queries for events and metric data types,	60		✓

		inspect the query, and add data sources. In addition, the learners will be able to configure annotations, links, and variables in dashboards.				
9	BMC Helix Operations Management: Fundamentals Implementing Alarm Policies (WBT)	This course introduces the learners to alarm policies. In this course, the students will learn about different types of alarm generation conditions and threshold conditions. The students will become familiar with instances for alarms, post-trigger actions for alarm events, policy precedence, and baselines. In addition, the students will learn to work with alarm policies and use out-of-the-box policies.	60		✓	
10	BMC Helix Operations Management: Fundamentals Monitor Policies (WBT)	This course introduces the learners to monitor policies. In this course, the students will learn to create a monitor policy that involves adding monitoring configurations, setting a polling interval, deactivating agent side collection, and configuring variables. In addition, the students will learn to work with monitor policies and use out-of-the-box monitor policies.	40		✓	
11	BMC Helix Operations Management: Fundamentals Generating Events from Logs (WBT)	This course teaches the learners to create alerts in BMC Helix Log Analytics. In addition, the students will learn to add log event panels in BMC Helix Dashboards and view log events in BMC Helix Operations Management.	30		✓	
12	BMC Helix Operations Management: Fundamentals Aggregating Events using Correlation Policies (WBT)	This course introduces the learners to correlation policy. The course explains how a correlation policy helps in aggregating events based on set conditions. At the end of the course, the learners will be able to create correlation policies and view aggregated events.	20		✓	
13	BMC Helix Operations Management: Fundamentals Event Policy (WBT)	This course introduces the students to event policies. The students will learn to create a basic enrichment event policy. In addition, the students will learn about the out-of-the-box policy templates and	40		✓
