## PURPOSE OF EXAM

Companies deploying and using Control-M realize full value only when their solution is effectively implemented, operated, and administrated. To ensure deployments and operations are performed to best practice standards, BMC Software maintains a technical certification program.

The **BMC Certified Associate: Control-M 9.0.19.x for Automation API Developers Online Exam** will validate the technical competencies needed to successfully work with Control-M Automation API.

## Skills Tested

Participants will be tested on their knowledge of the following:

- » Basic Control-M concepts
- » Basics Control-M Automation API concepts
- » Basics of JSON
- » How to write job definitions in JSON
- » Control-M Automation API Services
- » How to check the jobs statuses using the ctm run status command
- » Basics of Control-M Workbench
- » How to define order dependency between jobs using Flow and Events objects
- » How to order deployed job definitions using the ctm run order command
- » How to use the configuration file parameter while ordering deployed job definitions
- » How to define scheduling criteria using the When property
- » How to use If statements and actions to define post execution actions
- » How to define Notifications in job definitions to check certain scenarios before, during and, after job execution.

For detailed information around these topics, refer to the course abstract(s) for the recommended course(s).
