BMC Certified Associate: Control-M 20.x for Schedulers Online Exam

PURPOSE OF EXAM
Companies deploying and using Control-M realize full value only when their solution is effectively implemented, operated, and administrated. To ensure deployments and operations are performed to best practice standards, BMC Software maintains a technical certification program.

The BMC Certified Associate: Control-M 20.x for Schedulers Online Exam will validate the technical competencies needed to successfully schedule and manage jobs in the Control-M environment.

Skills Tested
Participants will be tested on their knowledge of the following:

» Control-M terminology, architecture, and key components
» Using Control-M interface for the creation and scheduling of job definitions
» Working with Control-M variables
» Configuring and using Notifications and On-Do actions
» Using Control and Quantitative resources
» Managing job workload using the Workload Policy Manager
» Creating and using SMART folders
» Creating and using job templates

For detailed information around these topics, refer to the course abstract(s) for the recommended course(s).

Recommended BMC Software Courses to Prepare for the Certification
The following course offered by BMC Education Services prepare participants to take the Certified Associate exam and also improve their knowledge and skill level to help build proficiency with the solution:

» Control-M 20.x: Fundamentals Using (WBT)
» Control-M 20.x: Fundamentals Operating (ILT, VILT)
» Control-M 20.x: Fundamentals Scheduling (ILT, VILT)
Certification Brief

Getting Started
The last course in the learning path includes one certification exam attempt in the price of the course.
