

Control-M 20.x: Fundamentals Operating

COURSE ABSTRACT

COURSE CODE

» AUTO-CMFO-0920

APPLICABLE VERSIONS

» Control-M 9.0.20

DELIVERY METHOD

» Instructor-led Training (ILT)

COURSE DURATION

» 1 Day

PREREQUISITES

» *Control-M 20.x: Fundamentals Using (WBT)*

Course Overview

Control-M makes it easy to define, schedule, manage and monitor application workflows, ensuring visibility and reliability, and improving SLAs. Control-M Users can monitor and manage multi-application workflows from a single point of control with full access to logs and output.

This instructor-led training helps participants to understand how to monitor your workflows and identify potential problems. The topics covered are using Viewpoints to monitor active jobs and performing necessary job actions, monitoring alerts, and file transfers.

Target Audience

- » Operators
- » Schedulers
- » Administrators
- » Consultants

Learner Objectives

- » List the basic Control-M operations
- » Understand the different Control-M Roles and their responsibilities in the Control-M environment
- » Work with Control-M Web interface
- » Navigate through the Monitoring domain
- » Use the Configuration domain to monitor Control-M components and their status
- » Monitor and manage job processing in the Control-M environment
- » Use Properties pane to access job details
- » Use Find functionality to search for jobs
