Course Overview

Control-M makes it easy to define, schedule, manage, and monitor application workflows, ensuring visibility and reliability, and improving SLAs. Control-M Users can monitor and manage multiple application workflows from a single point of control with full access to logs and output.

This assisted self-paced training helps participants to understand how to monitor job workflows and identify potential issues in the workflows in Control-M GUI and Control-M Web interfaces. The topics covered are identifying job definitions and dependencies, using Viewpoints to monitor active jobs and perform necessary job actions, monitoring Services and Alerts, and creating reports in Control-M.

Target Audience

- » Operators
- » Schedulers
- » Administrators
- » Consultants

Learner Objectives
