

Control-M 22: Overview (WBT)

[Learning Path >](#)

Course Code: AUTO-CSOV-9220

Modality

Web-Based Training (WBT)

Duration

30 Minutes

Applicable Versions

Control-M 9.0.22.000

Target Audience

- Operators
- Schedulers
- Developers
- Administrators

Course Overview

Control-M simplifies workflow orchestration, making it easy to define, schedule, manage, and monitor application and data workflows, ensuring visibility and reliability, and improving SLAs.

This web-based training introduces learners to Control-M, BMC's workload automation and orchestration solution. It covers key features, capabilities, and architecture for both Self-Hosted (On-Prem) and Control-M SaaS, as well as different Domains and key terminology differences. The course also explains various roles and responsibilities in Control-M.

Note: In addition to English, the textual content of this course is available in French, German, Italian, Japanese, Korean, Portuguese (Brazil), Simplified Chinese, and Spanish (Mexico).

Learning Objectives

- Understand the purpose and core functions of Control-M
- Explore key features and capabilities
- Understand navigating Control-M interfaces
- Understand the structure and components of jobs, workflows, and folders
