

Control-M 22: Installing and Configuring Data Assurance (ASP)

[Learning Path >](#)

Course Code: AUTO-DAIC-9220-ASP

Modality

Assisted Self-Paced (ASP)

Duration

Equal to 1 Day

Applicable Versions

- Control-M 9.0.22.000

Target Audience

- Administrators
- Schedulers

Course Overview

Control-M Data Assurance is an add-on that enables you to monitor and verify the quality and accuracy of your data across multiple data sources, before, during, and after they are extracted, transformed, and loaded through Control-M workflows or plug-ins.

This course explains the basics of Data Assurance, including Data Assurance Profiles, the Data Assurance user interface, and various Data Assurance metrics.

Participants will learn to install and configure the Data Assurance Application Plug-in, create a metric to validate data, and define a Data Assurance job. Hands-on labs allow participants to apply the procedures and concepts presented in the class.

Note: This course offers additional multilingual subtitles/closed captioning (cc), generated using an Artificial Intelligence translation tool, in French, German, Italian, Japanese, Korean, Portuguese (Brazil), Simplified Chinese, and Spanish.

Prerequisites

- Control-M 22: Overview (WBT)
- Control-M 22: Concepts for Operators and Schedulers (WBT)
- Control-M 21.x: Comparing Web Interface with Client Interface (WBT)

Recommended Trainings

- Control-M 22: Fundamentals Operating (ASP/ILT)
- Schedulers - Control-M 22: Fundamentals Scheduling (ILT/ASP) **OR** Administrators - Control-M 22: Fundamentals Administering (ILT/ASP)

Learning Objectives

- Explain the basics of Data Assurance
- Install and configure the Data Assurance Application Plug-in and Server
- Create Connection Profiles for Data Assurance
- Understand the Data Assurance user interface
- Understand the different Data Assurance Metrics
- Create a metric to validate the data
- Define a Data Assurance job

Course Activities

- Video Coaching
- Course eBook
- Virtual Lab
- Community Access
- Hands-on Lab Exercises

Virtual Lab

- Lab Vouchers are issued at course registration time and must be redeemed within **90 days** of receipt. Once Lab Voucher is redeemed, **28 days** of lab access (portal access) are granted with **6 hours** of on-demand lab time to be used. Once the lab time is used, or the 28 days expires, the lab access ends.
- Click **here** for additional ASP virtual lab access information in a graphical format.

Course Modules

Module 1: Introduction to Data Assurance

- Understand the basics of Data Assurance
- Explain how Data Assurance helps to prevent bad data

Module 2: Installing Data Assurance

- Install the Data Assurance Application Plug-in
- Install the Data Assurance Server

Module 3: Creating a Data Assurance Connection Profile

- Create Connection Profiles for the Data Assurance Application Plug-in

Module 4: Configuring Data Assurance

- Add Data Sources
- Create Monitors

Module 5: Defining a Data Assurance Job

- Create a Data Assurance job to validate the data
