TrueSight Server Automation 20.x: Fundamentals Administering – Part 1 (WBT)

COURSE ABSTRACT

COURSE CODE
» AUTO-SAF1-2002

APPLICABLE VERSIONS
» TrueSight Server Automation 20.x

DELIVERY METHOD 🌐
» Web-based Training (WBT)

COURSE DURATION 🌐
» 1 Hour

PREREQUISITES
» *TrueSight Server Automation 20.x: Overview (WBT)*

Course Overview

TrueSight Server Automation is a leading platform for the management, control, and enforcement of configuration changes in the datacenter. BMC Education Services offers learning paths for key roles across industries and organizations.

The *TrueSight Server Automation 20.x: Fundamentals Administering – Part 1 (WBT)* online course introduces students to the core components that make up the TrueSight Server Automation environment, and the user interface that provides end-user functionality. Through examples, students learn about the key benefits and features of the TrueSight Server Automation Suite. Students will also learn about the architecture of the TrueSight Server Automation solution, along with concepts and terminology related to the product functionality.

Note: Students should have a basic understanding of UNIX and Microsoft Windows operating systems, relational databases, network and application server administration, and client server application deployment.

Target Audience

» Administrators
  – TrueSight Server Automation Specialists

Learner Objectives

» Identify key features and benefits of the TrueSight Server Automation solution
» Describe the component architecture of TrueSight Server Automation
» Explain the relationships of the various solution components to product functionality
» Define TrueSight Server Automation terminology
» Describe the types of IT Management tasks that can be created and scheduled using the TSSA Console
» Explain the purpose of the tasks that TSSA controls
» Describe the functionality of TSSA
» Identify the functional architecture of TSSA
