TrueSight Automation Console 22.x: Fundamentals Using

COURSE ABSTRACT

COURSE CODE

» AUTO-TCFU-2220

APPLICABLE VERSIONS

» TrueSight Automation Console 22.2

DELIVERY METHOD 🌐

» Instructor-Led Training (ILT)

COURSE DURATION 🌐

» 2 Days

PREREQUISITES

» TrueSight Automation Console 21.x: Fundamentals Using (WBT)

RECOMMENDED TRAININGS

» None

Course Overview

Security vulnerabilities are more numerous than ever and pose a threat in hybrid cloud, public cloud, and on-premises IT environments. Security, Operations, and Cloud teams are overwhelmed with the number of security patches and configuration changes they need to deploy, a clear indication that manual methods and tools need to be replaced with automated solutions. TrueSight Automation Console integrates with TrueSight Server Automation to identify, analyze, and remediate missing patches and vulnerabilities in your environment.

This course guides learners through use of the TrueSight Automation Console by installing and configuring the TrueSight Automation Console product. It then walks the users through the process of vulnerability, patch, and compliance assessment and remediations.

Target Audience

» Administrators
» Consultants

Learner Objectives

» Install and configure the TrueSight Automation Console product
» Work with patch policies
» Work with vulnerabilities
» Work with compliance
» Work with Operation Templates
» Manage connectors
» Perform Administrative tasks for the TrueSight Automation Console product

Course Modules

Module 1: Installing TrueSight Automation Console
» Discuss the pre-deployment considerations, sizing recommendations, and deployment options for your environment.
» Download the installation file and complete the pre-installation tasks.
» Install TrueSight Automation Console components in the interactive mode

Module 2: Using the TrueSight Automation Console
» Access the TrueSight Automation Console
» Navigate through the Automation Console

Module 3: Patch Assessment and Analysis
» Describe a patch policy
» Execute a patch policy
» View the patch policy results
» Edit, enable, and disable a patch policy

Module 4: Vulnerability Assessment and Remediation
» Describe vulnerabilities
» Explain the process of mapping and unmapping vulnerabilities
» View and export vulnerabilities
» Perform the mapping and unmapping of vulnerabilities

Module 5: Compliance Assessment and Remediation
» Describe compliance and the compliance policy scan process
» Add a Compliance Scan Policy
» Execute a compliance scan policy
» View compliance policy scan results
» Disable and enable a compliance scan policy
» Removing a compliance scan policy

Module 6: Working with Operation Templates
» Define Operation Templates

» Add an Operation Template
» Work with Operation Templates
» Create an operation using a template
» Edit and remove an operation Template

Module 7: Managing Connectors
» Configuring the TrueSight Server Automation connector
» Configuring the BMC Discovery connector

Module 8: Administering TrueSight Automation Console
» Migrate from a containerized database to an external PostgreSQL database
» Configure application clusters
» Configure log file settings
» Configure TrueSight Automation Console for high availability
» Work with Security Groups
» Work with Service Level Agreements
» Manage Exceptions
