Course Overview

Organizations depend on high performance across their network to keep the business running at peak efficiency, but new security threats make it hard for network administrators to keep pace with the demands for new services while safeguarding the health of the network. TrueSight Network Automation helps to reduce network outages and downtime by automating the configuration and compliance of network assets.

This course guides learners through the use of TrueSight Network Automation by exploring features and functionality, configuring and managing network devices, and performing administrative tasks.

Target Audience

» Administrators
» Consultants

Learner Objectives

» Explain the features and functionalities of TrueSight Network Automation
» Manage device and device configurations
» Define user goals and features
» Define various integrations
» Perform administrative tasks
» Perform development tasks
COURSE ABSTRACT

TrueSight Network Automation 20.x: Fundamentals Using (WBT)

COURSE ACTIVITIES
- Demonstrations
- Scenarios
- Simulations

TRUESIGHT NETWORK LEARNING PATH
- Coming Soon.

ACCREDITATION AND CERTIFICATION PATHS
- This course is not part of a BMC Certification Path

Course Modules

Module 1: Introduction to TrueSight Network Automation
- TrueSight Network Automation Overview
- Architecture and Components
- Navigating TrueSight Network Automation
- Customizing TrueSight Network Automation

Module 2: Device and Configuration Management
- Adding a device
- Defining a Filter for the Device Listing
- Importing a device

Module 3: User Goals and Features
- Managing jobs
- Defining Compliance Rules
- Viewing and fixing Compliance Violations
- Managing Templates, and Policies
- Managing reports

Module 4: Integrations
- Integrating TrueSight Network Automation with BMC solutions

Module 5: Administering
- Network Administration Tasks
- System Administration Tasks

Module 6: Developing
- Using the REST API
- Developing Device Adapters
