**Course Overview**

This course familiarizes Control-M operators, schedulers, and administrators to the new features and functionality available in Control-M Workload Automation v8.0.

Participants are introduced to the new Control-M Workload Automation interface, including changes in terminology, changes in how job definition changes are processed, modifications to the Control-M/Server and Control-M/Agent, updates to the installation process, and changes to Control-M in the z\OS platform. The upgrade process and available support resources are also discussed.

**Course Objectives**

- Introduce the redesigned interface for Control-M Workload Automation 8.0
- Review modifications to Control-M terminology
- Describe changes in how job definitions are synchronized
- Describe enhancements to the Control-M/Server
- Describe enhancements to the Control-M/Agent
- Describe the new and enhanced changes to installation process
- Explore changes in common tasks for operators and schedulers
- Examine the recommended upgrade process
- Review changes made to Control-M in the z\OS platform
- Explore resources available to assist with the upgrade process
