Course Overview

This course is designed to teach the concepts of Control-M Workload Change Manager, including introducing its basic concepts and providing an overview of the change request lifecycle. Students will learn how to use the Control-M Workload Change Manager console to create, validate, and submit change requests. Students will also learn how to manage and approve received change requests using features available in the Control-M Workload Automation interface. Lastly, students will learn how to use the Site Customization and Site Standard tools to customize, create, and enforce workflow standards.

Course Objectives

» Explain Control-M Workload Change Manager concepts
» Describe Control-M Workload Change Manager components
» Examine the use of the Control-M Workload Change Manager interface to
  – Create change requests with new job flows
  – Create change requests based on existing job flows
  – Take control of other change requests
  – Use notes to communicate issues and questions
  – Validate change requests
