Course Overview

IT process automation can significantly lower the cost of IT delivery and reduce the risk associated with manual interactions. TrueSight Orchestrator automates common, repeatable tasks to improve quality of service across the board.

This instructor-led, hands-on course guides learners through the use of web services within TrueSight Orchestration. In this course learners will use web services in TrueSight Orchestration to remotely trigger TrueSight Orchestration workflows and return responses with the workflow output. Material is provided that can be referenced during and after the class.
