

BMC Compuware Abend-AID 17.x: Fundamentals in Topaz Workbench Using (WBT)

COURSE ABSTRACT

COURSE CODE

- » CPAА-TOWU-F1702

APPLICABLE VERSIONS

- » BMC Compuware Abend-AID 17.02

DELIVERY METHOD

- » Web-based Training (WBT)

COURSE DURATION

- » 1 hour

PREREQUISITES

- » None

RECOMMENDED TRAININGS

- » Basic knowledge of Topaz Workbench

Course Overview

BMC Compuware Abend-AID is a failure resolution and fault management solution that enables developers to reduce the tedious and time-consuming task of manually cross-referencing pages of recorded application memory information with pages of application code to understand why an application failure occurred.

BMC Compuware Topaz Workbench provides an intuitive interface using which you can access all the tools in the Topaz suite, including BMC Compuware Abend-AID. The abend analysis can be viewed in a 3270 session or Compuware's Topaz Workbench Eclipse-based IDE.

This web-based course introduces learners to the features and capabilities available in BMC Compuware Abend-AID when evoked from Topaz Workbench. The course also provides an understanding of how to use these features and capabilities to detect, analyze, and resolve mainframe application and system abends. The course is presented as interactive demonstrations that guide the learners on how to navigate through the Batch basic and CICS reports and other sections in Abend-AID and understand how they can determine the cause of application failures, use the root cause analysis feature, and gather information on abends.

Target Audience

- » Application Programmers
- » System Programmers

Learner Objectives

- » Understand how to navigate through an Abend-AID Batch basic report in Topaz Workbench to identify the cause of application failures
- » Understand how to navigate through an Abend-AID for CICS basic report in Topaz Workbench to identify the cause of application failures
- » Describe how to use the root cause analysis feature in Abend-AID in Topaz Workbench to detect the root cause of an abend
- » Explain the Db2 section of the Abend-AID report in Topaz Workbench to gather information on abends

BMC Compuware Abend-AID 17.x: Fundamentals in Topaz Workbench Using (WBT)

COURSE ABSTRACT

COURSE ACTIVITIES

- » Interactive demonstrations

BMC COMPUWARE ABEND-AID LEARNING PATH

- » <https://www.bmc.com/education/courses/bmc-compuware-training.html>

ACCREDITATION AND CERTIFICATION PATHS

- » This course is not part of a BMC Certification Path.

DISCOUNT OPTIONS

- » Have multiple students? Contact us to discuss hosting a private class for your organization
- » [Contact us for additional information](#) 

Course Lessons

Lesson 1: Fundamentals for Batch Basics in Topaz Workbench

- » Understand how to navigate through an Abend-AID Batch basic report in Topaz Workbench to identify the cause of application failures

Lesson 2: Fundamentals for CICS Basics in Topaz Workbench

- » Understand how to navigate through an Abend-AID for CICS basic report in Topaz Workbench to identify the cause of application failures

Lesson 3: Fundamentals Root Cause Analysis in Topaz Workbench

- » Describe how to use the root cause analysis feature in Abend-AID in Topaz Workbench to detect the root cause of an abend

Lesson 4: Fundamentals Db2 Section in Topaz Workbench

- » Explain the Db2 section of the Abend-AID report in Topaz Workbench to gather information on abends
