

BMC AMI DevX Abend-AID 17.x: Advanced Using (WBT)

COURSE ABSTRACT

COURSE CODE

- » CPAA-USNG-A1702

APPLICABLE VERSIONS

- » BMC Compuware Abend-AID 12.04, 16.05, and 17.02
- » BMC AMI DevX Abend-AID 17.02

DELIVERY METHOD

- » Web-based Training (WBT)

COURSE DURATION

- » 1 hour

PREREQUISITES

- » BMC AMI DevX Abend-AID 17.x: Fundamentals Using (WBT)
- » BMC AMI DevX Abend-AID 17.x: Fundamentals in Topaz Workbench Using (WBT)

RECOMMENDED TRAININGS

- » None

Course Overview

BMC AMI DevX Abend-AID (formerly BMC AMI DevX Abend-AID) is a failure resolution and fault management solution that enables developers to reduce the tedious and time-consuming task of manually cross-referencing pages of recorded application memory information with pages of application code to understand why an application failure occurred.

This web-based course helps learners explore the advanced features and capabilities available in Abend-AID and provides an understanding of how to use these features and capabilities to detect, analyze, and resolve mainframe application and system abends. The course is presented as interactive demonstrations that guide the learners on extended search, perform flow, the Cust command, and user customization.

*This course was created with the former Compuware names, but the content is valid for users of both versions. The course lessons have not been changed to reflect the new names.

Target Audience

- » Application Programmers
- » System Programmers

Learner Objectives

- » Explore the user customization features available in the Abend-AID viewer.
- » Understand how to use the Cust command to customize the Abend-AID for Batch and Abend-AID for CICS operating environment
- » Understand how to perform extended search in Abend-AID
- » Explain Abend-AID's function called perform flow
- » Understand how to perform Extended Search in Topaz Workbench
- » Describe the COBOL Perform Flow feature in the Abend-AID reports

BMC AMI DevX Abend-AID 17.x: Advanced Using (WBT)

COURSE ABSTRACT

COURSE ACTIVITIES

- » Interactive demonstrations

BMC COMPUWARE ABEND-AID LEARNING PATH

Course Lessons

Lesson 1: Advanced User Customization

- » Explore the user customization features available in the Abend-AID viewer

Lesson 2: Advanced CUST Command

- » Understand how to use the Cust command to customize the Abend-AID for Batch and Abend-AID for CICS operating environments

Lesson 3: Advanced Extended Search

- » Understand how to perform extended search in Abend-AID

Lesson 4: Advanced Perform Flow

- » Explain Abend-AID's advanced function called perform flow

Lesson 5: Advanced Extended Search in Topaz Workbench

- » Understand how to perform extended search in Topaz Workbench

Lesson 6: Advanced Perform Flow in Topaz Workbench

- » Describe the COBOL Perform Flow Option in the Abend-AID reports
