

BMC AMI DevX Code Insights 25: Using Exam

[Learning Path >](#)

Certification Code: CPCI-USNG-2504-EXA

Modality	Duration	Applicable Versions	Target
Online – Live Proctored	2 Hours	23.06 and above	• Developers • Programmers

Purpose of Exam

BMC AMI DevX Code Insights empowers developers to analyze mainframe programs intelligently, visualize underlying code structure, dependencies, and logic flow, and break apart mainframe applications into smaller, callable subprograms. The BMC AMI Platform provides AI services for BMC AMI DevX Code Insights, enabling quick understanding of complex and unfamiliar code.

As a Developer or Programmer, you can visualize the program in real time using the Runtime Visualizer and perform Code Analysis with features such as Program Structure, Program Summary, Procedures, Problems, and Data and Logic Flow. Knowledge of Code Explain and Code Extract helps you to understand logic and data, break down programs, update code, and improve your performance.

BMC Software maintains a technical certification program to ensure that developers and programmers excel in their tasks.

The **BMC AMI DevX Code Insights 25: Using Exam** will validate the technical competencies needed to understand the Code Insights functionality in Workbench for Eclipse and Workbench for VS Code, and to perform tasks related to code management.

Note: In addition to English, the exam is available in French, German, Italian, Japanese, Korean, Portuguese, Simplified Chinese, and Spanish.

Skills Tested

Participants will be tested on their knowledge of the following:

- Code Insights functionalities
- Using Runtime Visualizer
- Performing code analysis
- Using Code Extract
- Using Code Explain with BMC AMI Assistant

For detailed information around these topics, refer to the course abstract(s) for the recommended course(s).
