BMC AMI DevX Code
Pipeline 22.02

Target Audience

- Developers

Purpose of Skills Assessment

BMC AMI DevX Code Pipeline (formerly BMC Compuware ISPW) is a modern mainframe CI/CD tool that can ensure your mainframe code pipelines are secure, stable, and streamlined throughout the DevOps lifecycle. With Code Pipeline, you'll be confident that you can quickly and safely build, test, and deploy mainframe code.

To ensure the developers and operations are performed to best practice standards, BMC provides technical training based on the current skill levels of administrators.

The **BMC AMI DevX Code Pipeline 22.x: Fundamentals ISPF Skills Assessment for Developers** is to be taken by customers and partners to check their skills for key product areas **BEFORE** registering for any **BMC AMI Code Pipeline 22.x** training. Based on the result analysis, BMC can provide a recommendation on which training courses would fill potential skill gaps.

The skills assessment is not an exam and is not meant to test individuals but to provide students and teams an overview of existing and missing skills to select the appropriate training. Assessment takers shouldn't prepare and retake the assessment to avoid receiving incorrect recommendations.

Reviewed Skills

The knowledge and understanding around the following topics is checked:

- Introduction to the primary main menu
- Understand containers, assignments, logical views
- Understand the task list operations
- Describe generate impact and fallback operation
- Define the deployment life cycle for a component
- Understand the significance of check versions
