BMC AMI DevX Code Pipeline 22.02

Target Audience

- Developers

Purpose of Skills Assessment

BMC AMI DevX Code Pipeline (formerly BMC Compuware ISPW) is a modern mainframe CI/CD tool that can ensure your mainframe code pipelines are secure, stable, and streamlined throughout the DevOps lifecycle. With Code Pipeline, you'll be confident that you can quickly and safely build, test, and deploy mainframe code.

To ensure the development and operations are performed to best practice standards, BMC provides technical training based on the current skill levels of administrators.

The BMC AMI DevX Code Pipeline 22.x: Fundamentals Workbench for Eclipse Skills Assessment for Developers is to be taken by customers and partners to check their skills for key product areas BEFORE registering for any BMC AMI Code Pipeline 22.x training. Based on the result analysis, BMC can provide a recommendation on which training courses would fill potential skill gaps.

The skills assessment is not an exam and is not meant to test individuals but to provide students and teams an overview of existing and missing skills to select the appropriate training. Assessment takers shouldn't prepare and retake the assessment to avoid receiving incorrect recommendations.

Reviewed Skills

The knowledge and understanding around the following topics is checked:

- Get an overview of Code Pipeline and Workbench for Eclipse
- Accessing and navigating Code Pipeline from Workbench for Eclipse
- Understanding containers, tasks, components and release management
- Perform impact Analysis and generate
- Overview of release version, fallback operation and Replace version

Getting Started

Step 1.

Register for the skills assessment. The skills assessment is free of charge for all customers and partners.

Step 2.

Review the assessment results yourself or ask BMC to provide a report and feedback with training recommendations.
