

BMC AMI DevX Code Pipeline 22: Workbench for VS Code Exam

[Learning Path >](#)

Certification Code: CPIW-VSCO-221-EXA

Modality

Online – AI-Proctored

Duration

2 Hours

Applicable Versions

22.1

Target

- Developers
- Programmers

Purpose of Exam

BMC AMI DevX Code Pipeline is a modern CI/CD and source code management solution for mainframe applications. The integration of BMC AMI DevX Workbench Code Pipeline with Visual Studio Code allows mainframe developers to manage and interact with their Code Pipeline environment directly from within the VS Code interface.

The integration aims to streamline the mainframe development workflow by providing a modern, familiar IDE experience for Code Pipeline users. BMC Software maintains a technical certification program to ensure that developers and programmers excel in their tasks.

The **BMC AMI DevX Code Pipeline 22: Workbench for VS Code Exam** will validate the technical competencies needed to understand the integration and connection of BMC AMI DevX Workbench Code Pipeline with Visual Studio Code.

Note: In addition to English, the exam is available in French, German, Italian, Japanese, Korean, Portuguese, Simplified Chinese, and Spanish.

Skills Tested

Participants will be tested on their knowledge of the following:

- Integration of Code Pipeline with Visual Studio Code
- Search, browse, and compare two components
- Defining a runtime configuration for Code Pipeline on the mainframe
- Different tasks present in the Show as table option
- Different actions performed in task
- Various actions that can be performed in the set view
- Add and edit a release to the Code Pipeline extension
- Lifecycle flowchart through the Repository and Assignment view
- View the version of the component in the Repository and the Assignment

For detailed information around these topics, refer to the course abstract(s) for the recommended course(s).

Prerequisites

- NA

Recommended BMC Software Courses to Prepare for the Certification

The following course, offered by BMC Education Services prepares the participants to take the BMC AMI DevX Code Pipeline 22: Workbench for VS Code Exam and improve their knowledge and skill level to help build proficiency with the solution:

- BMC AMI DevX Code Pipeline 22: Concepts (WBT)
- BMC AMI DevX Code Pipeline 25: Fundamentals Using Workbench for VS Code (WBT)

Recommended Knowledge/Skills

Good knowledge of mainframe concepts and source code management.

Getting Started

Take the recommended courses for the exam.

Step 1. Register and pay for the exam.

Step 2. Study and prepare for the exam.

Step 3. Follow the instructions in your confirmation/registration email received after step 1.

Step 4. Take and pass the exam.

Step 5: Receive the completion badge.

If you have failed the exam, start at step 2. After 2 failed attempts, you need to purchase the exam again.

Examination Details

- Exam is an online AI-proctored exam.
- Further details and terms and conditions are available in the [BMC Certifications Program Guide](#).

Additional Recommended Resources to Study

- BMC AMI DevX Code Pipeline 22.01 Product Documentation
- BMC AMI DevX Code Pipeline 22.01 Communities

Recommended Experience

- 0-1 year of job experience in BMC AMI DevX Code Pipeline.

Retake Policy

- Participants who fail the exam make another attempt after waiting one week (7 days).
- Participants get to take up to 2 attempts per purchase.
- Participants purchase the exam again after 2 failed attempts.

Exam Registration

Choose from the following options to register for a BMC Education Services Exam:

- Register online for BMC Software certification exam at: www.bmc.com/education
- Contact your **BMC Education Advisor** for help with registration
