

BMC AMI DevX Code Pipeline 22: Developing in Workbench for Eclipse Exam

[Learning Path >](#)

Certification Code: **CPIW-WBE-221-EXA**

Modality

Online – AI-Proctored

Duration

2 Hours

Applicable Versions

22.1

Target

- Developers
- Programmers

Purpose of Exam

BMC AMI DevX Code Pipeline is a modern mainframe Software Change Management tool. Knowledge of BMC AMI DevX Code Pipeline will help you to quickly and safely change, build, test, and deploy mainframe code.

As an AMI DevX Code Pipeline Developer or Programmer, you can use AMI DevX Code Pipeline from the Workbench for Eclipse interface to build, test, and deploy mainframe code, and improve the quality, speed, and efficiency of mainframe software development. Knowledge of product development and the effective use of Code Pipeline functionalities in Workbench for Eclipse helps you ensure quality and efficiency in source code management, application development, and improve your performance.

BMC Software maintains a technical certification program to ensure that developers and programmers excel in their tasks.

The **BMC AMI DevX Code Pipeline 22: Developing in Workbench for Eclipse Exam** will validate the technical competencies needed to understand the Code Pipeline functionality in Workbench for Eclipse and to perform tasks related to source code management.

Note: In addition to English, the exam is available in French, German, Italian, Japanese, Korean, Portuguese, Simplified Chinese, and Spanish.

Skills Tested

Participants will be tested on their knowledge of the following:

- Code Pipeline and Workbench for Eclipse Concepts
- Containers, Tasks, and Application Life Cycle
- Manage Assignment Containers and Add Tasks
- Manage Release Containers and Tasks
- Edit and Generate a Task
- Impact Analysis, Versions, Compare, and Merge
- Promote, Regress, and Fallback
- Deploying and Troubleshooting
- Task History and Worklist

For detailed information around these topics, refer to the course abstract(s) for the recommended course(s).

Prerequisites

- NA

Recommended BMC Software Courses to Prepare for the Certification

The following course, offered by BMC Education Services prepares the participants to take the BMC AMI DevX Code Pipeline 22: Developing in Workbench for Eclipse Exam and improve their knowledge and skill level to help build proficiency with the solution:

- BMC AMI DevX Code Pipeline 22: Concepts (WBT)
- BMC AMI DevX Code Pipeline 22: Developing in Workbench for Eclipse (WBT)

Recommended Knowledge/Skills

Good knowledge of mainframe concepts and source code management.

Getting Started

Take the recommended courses for the exam.

Step 1. Register and pay for the exam.

Step 2. Study and prepare for the exam.

Step 3. Follow the instructions in your confirmation/registration email received after step 1.

Step 4. Take and pass the exam.

Step 5: Receive the completion badge.

If you have failed the exam, start at step 2. After 2 failed attempts, you need to purchase the exam again.

Examination Details

- Exam is an online AI-proctored exam.
- Further details and terms and conditions are available in the [BMC Certifications Program Guide](#).

Additional Recommended Resources to Study

- BMC AMI DevX Code Pipeline 22.01 Product Documentation
- BMC AMI DevX Code Pipeline 22.01 Communities

Recommended Experience

- 0-1 year of job experience in BMC AMI DevX Code Pipeline.

Retake Policy

- Participants who fail the exam make another attempt after waiting one week (7 days).
- Participants get to take up to 2 attempts per purchase.
- Participants purchase the exam again after 2 failed attempts.

Exam Registration

Choose from the following options to register for a BMC Education Services Exam:

- Register online for BMC Software certification exam at: www.bmc.com/education
- Contact your **BMC Education Advisor** for help with registration
