APPLICABLE VERSIONS

» 20.x

DELIVERY METHOD

» Web-based Training (WBT)

COURSE DURATION

» 23 Minutes

PREREQUISITES

» NA

RECOMMENDED TRAININGS

» NA

Course Overview

BMC AMI DevX Workbench for Eclipse (formerly BMC Compuware Topaz Workbench) provides an intuitive interface that enables developers of all skill levels to be quickly productive. The integrated UI provides access to all the tools in the DevX Workbench suite and BMC's other industry-leading developer tools—AMI DevX Abend-AID, AMI DevX File-AID, AMI DevX Code Pipeline (formerly ISPW), AMI Strobe, and AMI DevX Code Debug (formerly Xpediter)—as well as non-BMC products and distributed solutions.

This course presents content using web-based and video modalities. This course will enable the students to develop with Eclipse.

*This course was created with the former Compuware names, but the content is valid for users of both versions. The course lessons have not been changed to reflect the new names.

Target Audience

- » Developer
- » Application Programmer

Learner Objectives

- » Customize perspectives to contain additional views, menu items and task bar elements
- » Save perspectives under new names
- » Restore perspectives to default behavior
- » Achieve maximum productivity using projects and team sharing
