

BMC Compuware Topaz for Enterprise Data 18.x: Test Data Privacy Fundamentals Using (WBT)

COURSE ABSTRACT

COURSE CODE

» CPTO-TDPU-F1802

APPLICABLE VERSIONS

» 18.x

DELIVERY METHOD

» Web-based Training (WBT)

COURSE DURATION

» 1 Hour

PREREQUISITES

» BMC Compuware Topaz Workbench 20.x:
Fundamentals Developing (WBT)

RECOMMENDED TRAININGS

» NA

Course Overview

BMC Compuware Topaz for Enterprise Data enables developers and data architects to discover, visualize, and work with both mainframe and non-mainframe data in a common, intuitive manner.

This course presents content using web-based and video modalities. In this course, we will discuss the functionality of Topaz for Total Test, Functional Testing.

Target Audience

- » Developers
- » Testers

Learner Objectives

- » Understand the functionality of data elements, rules, coverage, composites, and normalization routines
- » Learn how to cover the most used resource administration options in the Data Privacy Menu
- » Perform steps to understand how to use the File-AID Data Privacy function of the Topaz Workbench
- » Learn how to create Source Data Identifiers against Data Elements
- » Understand how to create rules for masking data
- » Understand how Compuware's test data privacy solution and demonstrate how File-AID RDX works with DB2 to create an extract and extract related subsets of Db2 data
- » Demonstrate how to create new Data Elements with associated Source Data Identifiers (SDIs)
- » Create rules for those Data Elements

Course Lessons

Module 1: Test Data Privacy Additional Functions

- » Understand the functionality of data elements, rules, coverage, composites, and normalization routines

Module 2: Test Data Privacy Administration

- » Learn how to cover the most used resource administration options in the Data Privacy Menu

Module 3: Test Data Privacy Create Rules

- » Perform steps to understand how to use the File-AID Data Privacy function of the Topaz Workbench
- » Learn how to create Source Data Identifiers against Data Elements
- » Understand how to create rules for masking data

Module 4: Test Data Privacy DB2 Extract

- » Understand how Compuware's test data privacy solution and demonstrate how File-

AID RDX works with DB2 to create an extract and extract related subsets of Db2 data

Module 5: Test Data Privacy Simulation

- » Demonstrate how to create new Data Elements with associated Source Data Identifiers (SDIs)
- » Create rules for those Data Elements
