

CONTROL-M FOR MAINFRAME

Control-M for Mainframe 22: Overview (WBT)

[Learning Path >](#)

Course Code: CZZO-OVEW-F0922

Modality

Web-based Training (WBT)

Duration

30 Minutes

Applicable Product

Control-M for Mainframe
9.0.22.000

Target Audience

- Operators
- Schedulers
- Administrators

Course Overview

Control-M for Mainframe is designed for enterprise mainframe environments, delivering advanced job scheduling, workload automation, and centralized management using mainframe-specific capabilities.

The **Control-M for Mainframe 22: Overview (WBT)** course introduces Control-M as a unified solution spanning Self-hosted, Mainframe, and SaaS (cloud-based) platforms. It provides an overview of Control-M for Mainframe products and their role in enabling business processes, along with insights into how these products integrate through the Integrated Operations Architecture (IOA).

Note: In addition to English, the textual content of this course is available in Chinese (Simplified), French, German, Italian, Japanese, Korean, Portuguese (Brazil), and Spanish (Mexico).

Learning Objectives

- Describe Control-M Architecture
- Explain Control-M Unified View
- Understand Control-M Self-hosted, SaaS, and Mainframe platforms
- Describe Control-M for Mainframe Business Solutions and standalone products
