## Course Overview

BMC Helix CMDB provides a complete, accurate, and up-to-date view of the people, technologies, and services that make up your business and IT environments. A rich, centralized representation of services helps you plan, deliver, operate, govern, and assign priorities to business services.

The *BMC Helix CMDB 19.x: Fundamentals Administering - Part 2* course teaches students about what makes a Configuration Management Database (CMDB) useful to the business, how to configure the CMDB, and how to perform routine administrative and maintenance tasks.

This five-day course is focused on learning how the CMDB is used by key IT Service Management functions, such as Asset, Incident, and Change Management. Students will learn how to configure their environment to meet the requirements of CMDB consumers in the business. Additionally this course covers the routine administration and maintenance of the CMDB.

After having attended this course, you will be able to maximize the out-of-the-box functionality of BMC Helix CMDB.

**IMPORTANT:** Included in this course is the examination for **BMC Certified Associate: Helix CMDB 19.x Online Exam**. Taking the exam and pursuing accreditation is optional, however all students enrolled in the *BMC Helix CMDB 19.x: Fundamentals Administering - Part 2* course are automatically enrolled in the exam. You will have one attempt to pass the exam. No retakes will be offered. Those who pass will receive the title of **BMC Certified Associate: BMC Helix CMDB 19.x**.
