## PRODUCT RELEASE

- » BMC Remedy AR System 8.0

## DELIVERY METHOD

- » Web Based Training (WBT)

## COURSE DURATION

- » 6 hours

## TARGET AUDIENCE

- » AR System Developers

## PREREQUISITES

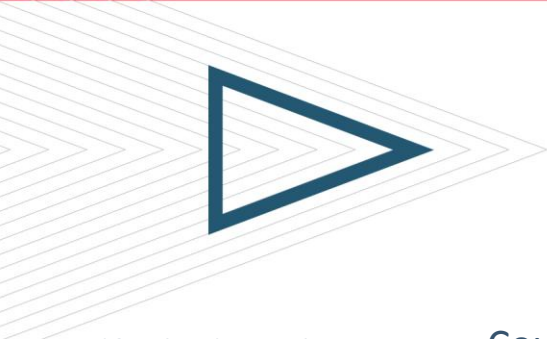

- » *BMC Remedy AR System 8.0: Foundation – Part 1* (WBT)
- » *BMC Remedy AR System 8.0: Foundation – Part 2* (ILT)

## Course Overview

In this course, you will learn about the best practices development process for building diverse and robust AR System applications, from requirements analysis and planning to application deployment. This course focuses on learning how to effectively gather application requirements and how to design, develop, test, implement, and maintain an AR System application to meet the application's requirements.

## Course Objectives

- » Identify the stages involved in the AR System development lifecycle
- » Describe the stages in the Requirements Analysis process
- » Outline the design strategies used when creating an AR System application
- » Identify the settings for developing an AR System application
- » List the guidelines for application testing, implementation, and maintenance
