Course Overview

BMC Client Management automates endpoint management and helps organizations control costs, maintain compliance, and reduce risk. From device acquisition to disposal, BMC Client Management provides an accurate view of hardware installations, ensures device adherence to organizational and industry policies, and supports systems and software currency.

This 2-day instructor led course provides the knowledge and critical skills necessary to administer BMC Client Management, with major focus placed upon Patch Management, Compliance Management, and Queries and Reporting capabilities.

This course is designed for beginner BMC Client Management Administrators who want to learn how to package and deploy system patches, monitor compliance using compliance rules, and extract useful information from the system using queries and reporting capabilities. Students will learn in a fast-paced environment created to transfer the maximum amount of Client Management expertise in a minimum amount of time.

Target Audience

- » Administrators
- » Developers
- » Users
- » Consultants

Learner Objectives

- » Explain Free Queries
- » Demonstrate examples of Commonly Built Queries
- » Perform the use of Queries to build Device Groups
- » Explain Query best practices.
- » Explain Patch Management
- » Review Patch Manager configuration
- » Explain Patch Knowledge Base parameters.
- » Perform Patch Scanning process.
- » Explain Patch Deployment philosophies.
- » Perform steps to generate out of the box reports.
- » Explain Compliance Management
- » Understand Compliance Rules and how device compliance works.
- » Explain how to create Compliance Rules using a Constant.
- » Perform Patch Scanning process.
- » Understand how to Re-evaluate Members of a Device Group
- » Explain SCAP Compliance
- » Perform SCAP Compliance configuration.
- » Define SCAP Compliance Alerts
- » Understand SCAP Compliance General Data.
