PURPOSE OF EXAM

BMC Helix delivers cognitive service management that is fast, accurate, cost effective and is available to run on your choice of cloud, in a hybrid model, or in your own data center. The BMC Helix solution's cognitive capabilities, meanwhile, can help reduce support costs. For example, intelligent chatbots can handle user queries and questions.

BMC Helix Chatbot is such an application that interacts with users through natural language, understands the conversation context, and performs tasks on behalf of the user. It helps users to resolve their issues or search for any information they need by providing the capabilities, such as immediate assistance to issues raised by the users and provides easy-to-find information, reduction in human error and dependency by eliminating human intervention for certain tasks, and reduction in company's costs and resources.

To ensure development and deployment of chatbot applications in BMC Helix Innovation Studio is performed to best practice standards, BMC Software maintains a technical certification program.

The **BMC Certified Associate for Helix Chatbot** Certification Exam will validate the technical competencies needed to successfully develop and deploy the Chatbot applications in BMC Helix Innovation Studio.
