

BMC Discovery 22.x: Fundamentals Application Modelling - Part 2 (ASP)

[Learning Path >](#)

Course Code: SPPT-DIMB-2220-ASP

Modality

Assisted Self-paced (ASP)

Duration

Equal to 1 Days

Applicable VersionsBMC Discovery 11.0,
11.1, 11.2, 11.3, 20.02,
20.08, 21.30, and 22.2**Target Audience**

- Administrators
- Consultants

Course Overview

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management, and infrastructure/operations management.

This self-paced course provides information on the mapping business application in various ways. Participants will receive all important information on the Definitions Block, Data Sources, and Static Application Mapping. The participants will also learn about adapting pattern template used in CMDB synchronization, and best practices to use TPL.

Prerequisites

- BMC Discovery 22.x: Fundamentals Application Modelling - Part 1 (ASP)

Recommended Trainings

- NA

Learning Objectives

- Explain Definition Blocks
- Explain Data Sources
- Adapt pattern templates used in CMDB Synchronization
- Create a Static Application Model
- Describe best practices to develop solutions

Virtual Lab

- Lab Vouchers are issued at course registration time and must be redeemed within **90 days** of receipt. Once Lab Voucher is redeemed, **28 days** of lab access (portal access) are granted with **6 hours** of on-demand lab time to be used. Once the lab time is used, or the 28 days expires, the lab access ends.
- Click [here](#) for additional ASP virtual lab access information in a graphical format.

Course Modules

Module 1: Definitions Block

- Introduction to Definitions Block
- User-defined Functions
- SQL Discovery

Module 2: Introduction to Data Source

- Data Source

Module 3: CMDB Sync Mapping

- CMDB Synchronization
- Viewing Data in the CMDB

Module 4: Static Application Modelling

- Concepts of Static Application Modelling
- Create and View a Static Application Model

Module 5: Best Practices for Developing Solutions

- Developing Patterns
- Writing Regular Expressions
- Preparing for Modelling
- Collaborative Application Mapping
- Extending Directly Discovered Data
- Constructing SIs and BAIs
