PREREQUISITES

- » BMC Discovery 22.x: Fundamentals Application Modelling - Part 1 (ASP)

Course Overview

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management, and infrastructure/operations management.

This self-paced course provides information on the mapping business application in various ways. Participants will receive all important information on the Definitions Block, Data Sources, and Static Application Mapping. The participants will also learn about adapting pattern template used in CMDB synchronization, and best practices to use TPL.

Target Audience

- » Administrators
- » Consultants

Learner Objectives

- » Explain Definition Blocks
- » Explain Data Sources
- » Adapt pattern templates used in CMDB Synchronization
- » Create a Static Application Model
- » Describe best practices to develop solutions
