Course Overview

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management, and infrastructure/operations management.

This self-paced course provides information on the mapping business application in various ways. Participants will build models of MS Exchange using SAAM, build a model of Tomcat Application Server using CAM, and update the Oracle Data Guard CAM model using TPL.

Target Audience

- » Administrators
- » Consultants

Learner Objectives
