

# BMC Discovery 24.x: Fundamentals

## Application Modeling – Part 3

[Learning Path](#)

Course Code: SPPT-DIMW-2430

### Modality

Instructor-Led Training (ILT)

### Duration

1 Day

### Applicable Versions

BMC Discovery 20.02, 20.08, 21.30, 22.2, and 24.3

### Target Audience

- Administrators
- Consultants

## Course Overview

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management, and infrastructure/operations management.

This course provides you hands-on experience to map business applications in various ways. You will build models of MS Exchange using SAM, build a model of Apache Tomcat Application Server using CAM, and update the Oracle Data Guard CAM model using TPL.

## Prerequisites

- BMC Discovery 24.x: Fundamentals Application Modeling – Part 1
- BMC Discovery 24.x: Fundamentals Application Modeling – Part 2

## Recommended Trainings

- NA

## Learning Objectives

- Incorporate Discovery Modeling skills learned in this course
- Create four models of MS Exchange Using Start Anywhere Modeling (SAM)
- Create a model of Apache Tomcat using CAM
- Create a dependency relationship from the TrueSight Automation model using TPL

## Course Modules
