- » SPPT-DISULT-SUBS

DELIVERY METHOD

- » Web-based Training (WBT)
- » Self-Paced Training (SPT)
- » Videos
- » Certifications
- » Skills Assessments

Subscription Overview

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management and infrastructure/operations management.

Using examples, demonstrations, and scenarios, the content of the online education subscription provides an overview of BMC Discovery and details the use of this solution.

IMPORTANT: This is an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.

Students can schedule up to 6 hours coaching annually. At BMC's discretion or based on customer demand, BMC reserves the right to change expert 1:1 coaching appointments to group coaching calls.

Target Audience

- » Administrators and Consultants

Learner Objectives

- » Learn how BMC Discovery works
- » Learn about the available dashboards and how they can be configured
- » Describe a taxonomy and view standard patterns from the user interface
- » Perform a discovery scan and learn how to interpret the results
- » Learn how storage discovery works in BMC Discovery
- » Diagnose and troubleshoot discovery issues
- » Perform the administration tasks for BMC Digital Workplace Basic and Advanced
- » Explain CMDB Consumers' requirements to Configuration Managers
- » Understand how IT Service Management (ITSM) consumes CMDB data
- » Describe the Common Data Model
- » Describe best practices for importing, normalizing, and reconciling data
- » Describe the data model and operating principles
- » Describe Start Anywhere Application Mapping (SAAM) and the Collaborative Application Mapping (CAM) process
- » Explain the Pattern Language (TPL) concepts
- » Extract data using XPath and Regular Expressions
- » Model Software Instances and Business Application Instances
- » Identify techniques available to discover the versions of Software Instances and Business Application Instances
- » Adapt pattern templates used in CMDB Synchronization
