

BMC Discovery 11.x: Using New Features (WBT)

COURSE ABSTRACT

COURSE CODE

- » SPPT-DIWN-1100

APPLICABLE VERSIONS

- » BMC Discovery 11.0 and 11.1

DELIVERY METHOD

- » Web-based Training

COURSE DURATION

- » 90 Minutes

PREREQUISITES

- » None

Course Overview

BMC Discovery, formerly ADDM, is a digital enterprise management solution that automates asset discovery and application dependency mapping to build a holistic view of all of your datacenter assets and the relationships between them.

This course provides an overview of the new features and enhancements in BMC Discovery 11.1. It introduces the users to the Start Anywhere Application Modeling (SAAM) feature. The course also explains clusters, credentials enhancements, infrastructure visualization, and CMDB resynchronization improvements. In addition, it describes integration with BMC Remedy Single Sign-On and the new user interface.

Target Audience

- » Users

Learner Objectives

- » Explain the Start Anywhere Application Modeling (SAAM) feature
- » Describe the credentials enhancements
- » Explain software and infrastructure visualization
- » Describe CMDB resynchronization performance improvements
- » Explain integration with BMC Remedy Single Sign-On
- » Explain the new user interface
