Subscription Overview

The goal of BMC Discovery is to automate asset discovery and identify systems in the network and obtain relevant information from them as quickly as possible and with the lowest impact, using a variety of different tools and techniques to communicate.

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management and infrastructure/operations management.

Using examples, demonstrations, and scenarios, the content of the online education subscription provides an overview of BMC Discovery and details the use of this solution to identify and remediate system vulnerabilities.

Note: This content is part of an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.
