VIRTUAL LAB ACCESS

This subscription contains Self-Paced Training (SPT) courses which have an optional eBook and Virtual Lab component.

With an Enterprise Education Subscription, an organization has access to a limited number of hands-on lab days annually. These lab days are shared between all employees of the organization.

If the organization has exceeded available lab days and an employee requests an Education Lab Voucher (ELV) to receive eBooks and Virtual Labs for an SPT course, the employee will receive an email communicating that the eBook and lab have not been ordered. However, the SPT course includes a recorded demonstration of the same lab exercises and can still be completed.

Additional hands-on lab days may be purchased in the event your organization has exceeded the allotted lab days for an Enterprise Education Subscription. Contact the Training Coordinator for BMC Training in your organization or education@bmc.com for assistance

Subscription Overview

As a self-service application, BMC Helix Digital Workplace allows users to connect to IT and HR anywhere and at any time. Using BMC Helix Digital Workplace users can share experiences and status information on resources. Based on this information IT organizations can gain insight into service usage trends to use in planning future organizational needs. A highly configurable application, administrators have the flexibility to configure the features available to users.

Using examples, demonstrations, and scenarios, the content of the online education subscription provides an overview of BMC Helix Digital Workplace and details the use of this solution to identify and remediate system vulnerabilities.

IMPORTANT: Self-Paced Training (SPT) courses contained in this subscription is comprised of a course instructor video that includes a demonstration of recorded lab exercises.

Note: This content is part of an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.
