

BMC Helix ITSM & CMDB: Ultimate Subscription

COURSE ABSTRACT

CURRICULUM CODE

» SPPT-HLXULT-SUBS

DELIVERY METHOD

- » Subscription-based
 - Web-based Training (WBT)
 - Virtual Instructor-led Training (VILT)
 - Assisted Self-paced Training (ASP)
 - Certification
 - Expert Coaching (maximum of 6 hours annually; minimum scheduled appointment duration is 30 minutes)

Subscription Overview

BMC Helix ITSM is a powerful service management platform that improves IT service delivery. The intuitive user experience is built around roles, not modules, to help you be more productive with less effort. Modern, mobile interfaces, built-in templates and guides, and instant, actionable insights help you work smarter and faster.

BMC Helix Configuration Management Database (CMDB) helps you to consolidate different sources of data into an enterprise-wide view, showing the components physical and logical relationships but also their relationships to business services.

Using examples, demonstrations, and scenarios, the content of the online education subscription provides an overview of BMC Helix ITSM and BMC Helix CMDB as well as detailing the use and administration of both solutions.

IMPORTANT: This is an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.

Students can schedule up to 6 hours coaching annually. At BMC's discretion or based on customer demand, BMC reserves the right to change expert 1:1 coaching appointments to group coaching calls.

Target Audience

- » Administrators
- » Consultants
- » End Users
- » Operators
- » Support

Learner Objectives

- » Understand the Access Control Model
- » Understand the Innovation Suite architecture
- » Explain configuring and monitoring options
- » Describe logging options
- » Utilize the right troubleshooting method
- » Explain CMDB Consumers' requirements to Configuration Managers
- » Understand how IT Service Management (ITSM) consumes CMDB data
- » Describe the Common Data Model
- » Describe best practices for importing, normalizing, and reconciling data
- » Describe ITSM application usage processes and roles
- » Identify ITSM architecture components
- » Configure and administer Smart IT
- » Introduce BMC Remedy Smart Reporting and create and work with reports, storyboards, and dashboard tabs
- » Develop codeless applications using Innovation studio
- » Design dashboards using BMC Helix Dashboards
