BMC Helix ITSM 22.x: Fundamentals Administering Applications (ASP)

COURSE ABSTRACT

COURSE CODE
» SPPT-ITAA-2210-ASP

PRODUCT RELEASE
» BMC Helix ITSM 22.1.06

DELIVERY METHOD 🌐
» Assisted Self-paced (ASP)
- Student and lab guide as ebook
- Product community for questions and answers
- Course recording via WBT
- Access to instructor for up to 2.5 hours by appointment (use within 28 days of registration)

VIRTUAL LAB ACCESS
» Lab Vouchers are issued at course registration time and must be redeemed within 90 days of receipt. Once Lab Voucher is redeemed, 28 days of lab access (portal access) are granted with 18 hours of on-demand lab time to be used. Once the lab time is used, or the 28 days expires, the lab access ends.
» Click **here** for additional ASP virtual lab access information in graphical format.

COURSE DURATION 🌐
» Equal to 3 Days

RECOMMENDED TRAININGS
» BMC Helix ITSM 22x: Fundamentals Administering - Part 1 (WBT)

Course Overview

BMC Helix ITSM is a powerful, industry leading service management platform and fueling your IT transformation with intelligent, people-centric user experiences that helps you work smarter. BMC Helix ITSM streamlines and automates the processes around IT service desk, asset management, and change management operations. It also enables you to link your business services to your IT infrastructure to help you manage the impact of technology changes on business and business changes on technology — in real time and into the future.

This course provides the application administrators with the concepts and hands-on experience to incorporate best practices when administering different BMC Helix ITSM applications. Using group discussions, and scenario-based guided lab exercises, participants analyze, determine, and perform the necessary steps to administer the applications for BMC Helix ITSM to support the corresponding business processes.

This course is focused on learning how to administer applications with the configurations for Incident Management, Problem Management, Change Management, Release Management, Asset Management, and Task Management. Students will learn how to create tickets, define templates, configure rules, configure approvals, customize process flows, create service targets, and manage notifications.
Note: This course does NOT include instruction on configuring or using Smart IT.

This course offers closed captioning in four additional languages: French, Spanish, Deutsch and Portuguese. The multi-lingual closed captioning is generated using artificial intelligence (AI) and machine translation so that more customers could benefit from our courses.

Target Audience
» Administrators
» Consultants

Learner Objectives
» Explain Incident Management and Incident Management Rules
» Explain Problem Management and Problem Management Rules
» Configure Change rules, Release, and Activity rules
» Describe Change and Release approvals and approval phases
» Create custom process flows
