» NA

## Course Overview

BMC Helix ITSM is a powerful, industry leading service management platform and fueling your IT transformation with intelligent, people-centric user experiences that helps you work smarter. BMC Helix ITSM streamlines and automates the processes around IT service desk, asset management, and change management operations. It also enables you to link your business services to your IT infrastructure to help you manage the impact of technology changes on business and business changes on technology — in real time and into the future.

This online course provides BMC Helix ITSM application administrators with an introduction to ITSM application administration and introduces the architecture and common configuration elements of the BMC Helix ITSM applications, including Problem Management, Incident Management, Change Management, Asset Management, and Service Level Management. The course provides BMC ITSM administrators with the concepts and skills needed to incorporate best practices when configuring and administering BMC Helix ITSM applications.

## Target Audience

» ITSM Application Administrators

## Learner Objectives

- » Explain the architecture of BMC Helix ITSM application and list supported platforms
