

BMC AMI Command Center for Db2® Learning Track: DBAs and SYSPROGs

CRT Certification

ILT Instructor-led Classroom/Online

WBT Web-based Training

ASP Assisted Self Paced

About the Product:

Command Center for Db2® (previously Workbench for Db2®) provides secure self-service for Database Administrators (DBAs), System Programmers (SYSPROGs), and Application Developers with an intuitive, web-based interface to manage Db2 databases and data.

It presents Db2 database information in an intuitive, graphical user interface (GUI), making it easier to understand and faster to manipulate. It maintains security by retaining all the access restrictions of the mainframe. It also simplifies development for optimized Db2 applications.

About the Training Target Group – DBA and SYSPROG Responsibilities:

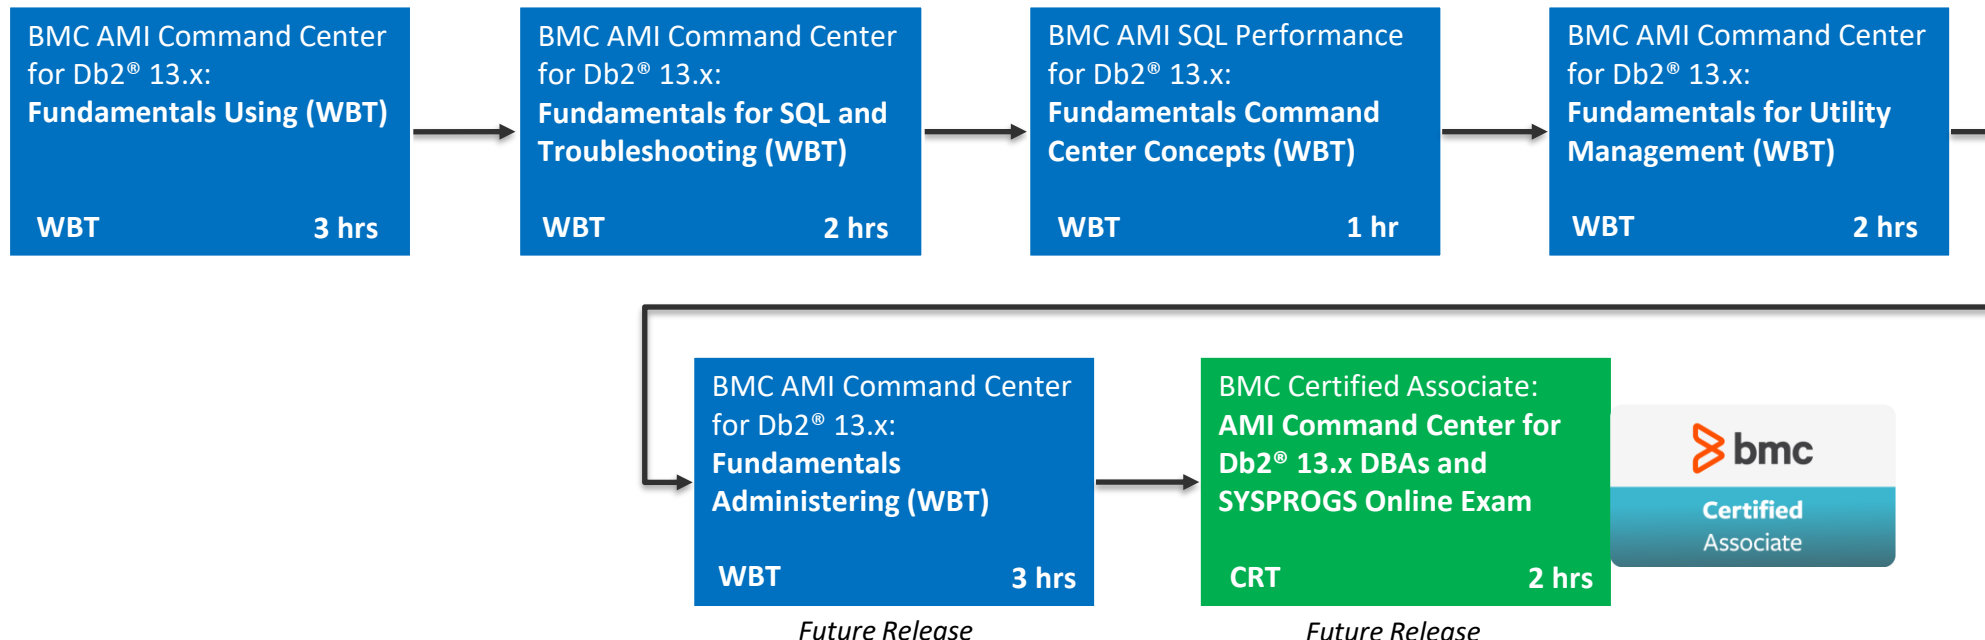

Manage Db2 Infrastructure; Tune and maintain SQL for performance

Recommended for: Database Administrators (DBAs) and System Programmers (SYSPROGs)

Training applicable to product versions: 12.1, 13.1

BMC AMI Command Center for Db2®, BMC AMI SQL Performance for Db2®

Fundamentals

BMC AMI Command Center for Db2® Learning Track: Db2 Application Developers
