

# BMC AMI SQL Performance for Db2® Learning Track: Database Administrators and System Programmers

CRT

Certification

ILT

Instructor-led Classroom/Online

WBT

Web-based Training

ASP

Assisted Self Paced

## About the Product:

BMC AMI SQL Performance for Db2® delivers modern solutions designed for a new generation of mainframe professionals to quickly eliminate wasteful SQL statements, manage performance throughout the application lifecycle, and audit privileged access to reduce risk. You will be able to understand how all these products contribute to rapidly diagnosing performance problems, tuning SQL, and anticipating and resolving slowdown to avoid bad SQL.

## About the Training Target Group – Database Administrator and System Programmer Responsibilities:

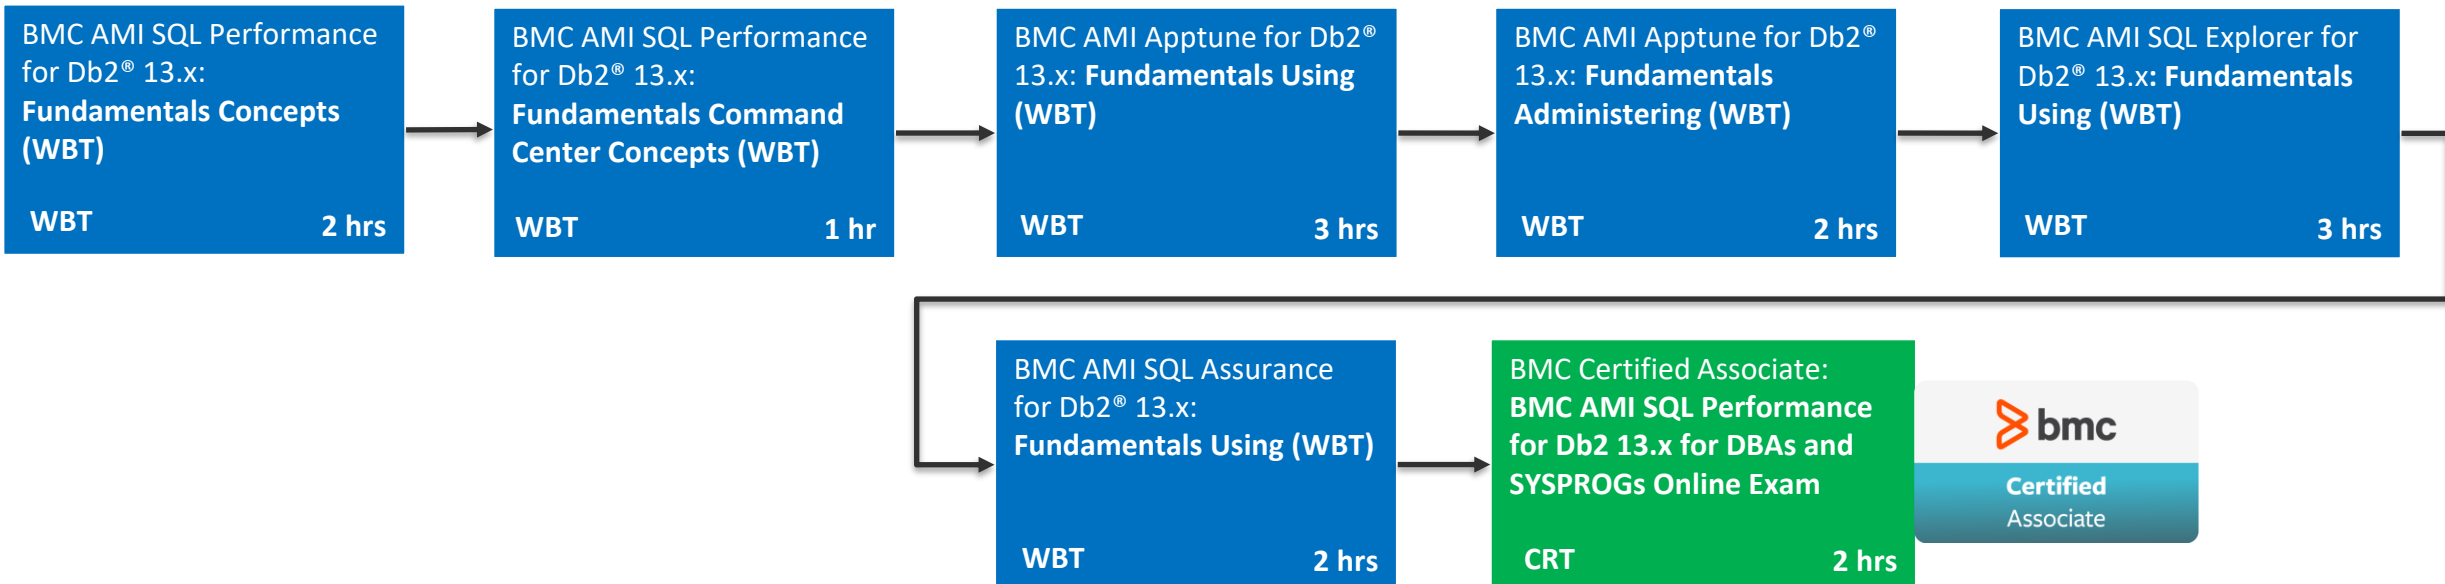

- Administer user profiles for system and SQL performance
- Tune SQL, anticipate, and resolve slowdown to avoid bad SQL
- Configure BMC AMI SQL Explorer for Db2® and Migrate Access Path Statistics
- Manage Jenkins integration with BMC AMI SQL Assurance for Db2®; Build BMC AMI SQL Assurance project pipeline

**Recommended for:** Database Administrators (DBAs) and System Programmers (SYSPROGs)

## Training applicable to product versions: 12.1, 13.1

BMC AMI Apptune for Db2®, BMC AMI SQL Explorer for Db2®, BMC AMI SQL Assurance for Db2®
