About the Product:

BMC AMI Database Performance for Db2® is a collection of technologically advanced solutions that deliver greatly improved performance, reduced application cost, and increased availability. It provides intelligent automation, allowing you to focus your efforts where they matter most: on the performance and availability of critical data assets.

About the Training Target Group – Database Administrator Responsibilities:

- Reorganize tablespaces and indexes and create image copies
- Rebalance partitions, collect statistics, and generate reports
- Control concurrent application availability and handle job restart
- Automate Reorg for tablespace and indexes that need a reorg using BMC AMI Utility Manager for Db2

Recommended for: Database Administrators

Training applicable to product versions: 12.1, 13.1

About the Solution:

BMC AMI Utilities for Db2® is designed for modern, complex Db2 environments. These tools help to manage Db2 proactively for optimized costs and peak application performance.

With a centralized architecture that provides intelligent policy-driven automation and innovative processing methods, increasing amounts of data with zero downtime and high integrity to meet new digital demands can be managed easily.

About the Training Target Group – Database Administrator and System Programmer Responsibilities:

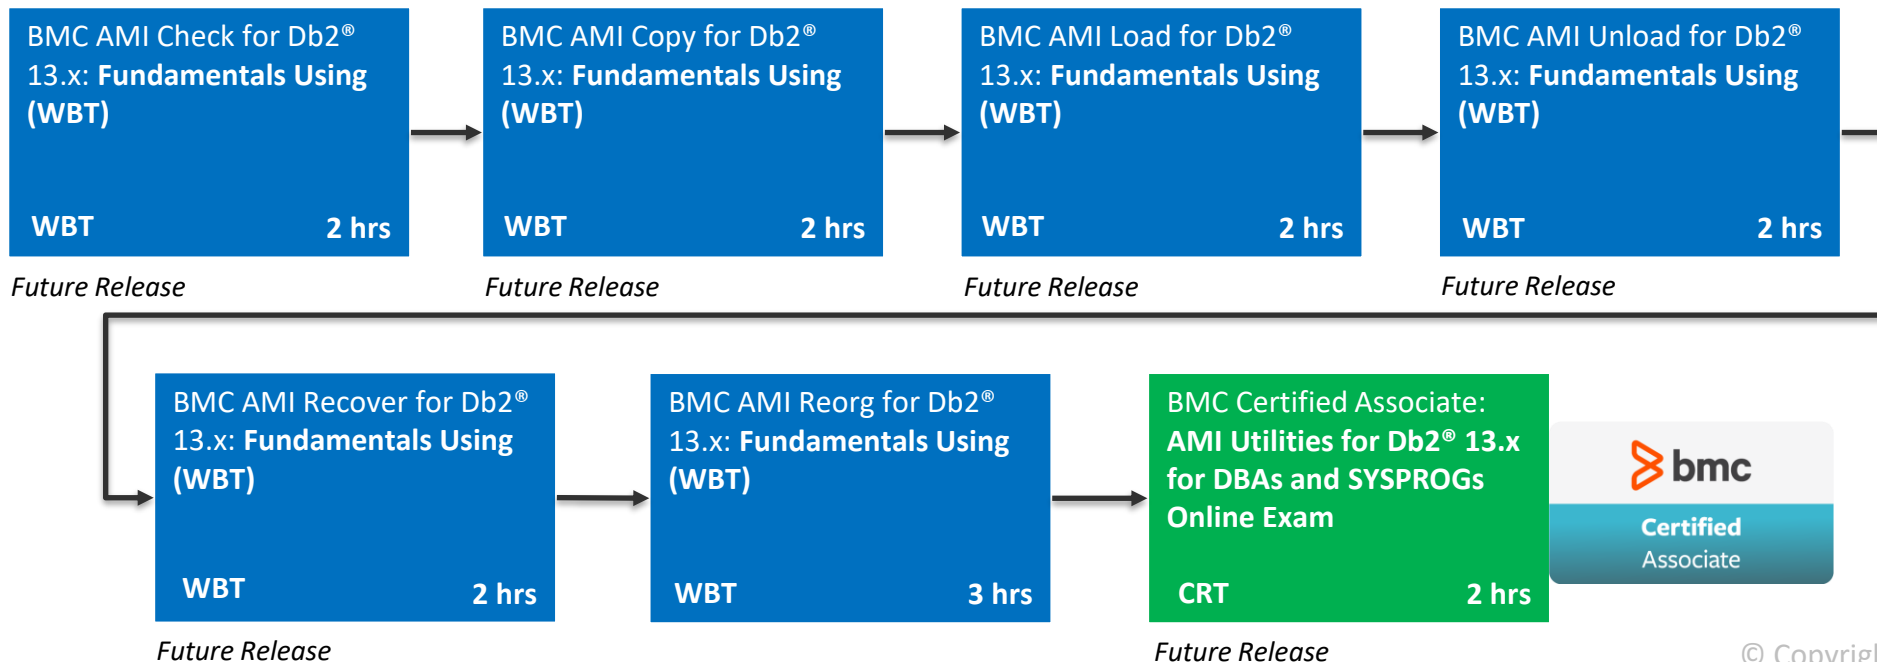

- Manage Db2 for optimized costs and peak application performance
- Monitor key utility usage metrics
- Generate and analyze reports

Recommended for: Database Administrators (DBAs) and System Programmers (SYSPROGs)

Training applicable to product versions: 12.1, 13.1

BMC AMI Check for Db2®, BMC AMI Copy for Db2®, BMC AMI Load for Db2®, BMC AMI Unload for Db2®, BMC AMI Recover for Db2®, BMC AMI Reorg for Db2®
